## PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

THE undersigned are prepared to introduce into use in Transesse W. E. CHILDS & CO.'S PATENT ELAS-TIUFIRE AND WATER-PROOF CEMENT ROSFING, and ask the attention of Architects, Builders, Railroad Co. panies, and the public to examine its superiority over other

ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resut the action of the atmosphere in every climate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the same phere, and will helther evaporate, crack nor rot; and, as to its carability, there is no question.

It is practically imperishable, and will perfectfully resist

any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will en-Roofing on over ordinary good heathing, and gravel tin, sine, copper, or iron roof n difference how steep or that they may bethe per our bundred square feet; it being far cheaper to an any Roof of the old style, and we are sure it It will also be found to be the best thing ever invente i to cover or mend old leaky tin, tarani gravel roofs, or around chimneys, scattles, dormar windows, and gutters, where the tin is rust d through. This Covert can be put on to last as long as sione, and form a perfect advessor to any object to which it is applied. To Roofs can be painted over (and warranted not to leak) at two d liars and fifty cents per hundred square feet, which is cheaper and much bet-tor than paint. This Roofing will be found to be the best theng for covering large Roofs where they are exposed to fir —such as Seam Mills, Saw Mills, Factories, Railroad Care, Bridges, Depots, Station Wouses, Steamboat Decks, and, in fast every kind of Roof where there is an external a sposure from fire. As the Roof is perfect, without a joint n it. It presents no chance for fire to communicate, and any ight sub-tance will burn out without igniting.

Tasur-nee Offices at Communit, and other places

where Childs & Co.'s Coment has been used, insure Build-ings with Roofs covered with this Coment, at the same rates as for those covered with Iron, Copper or Tin. The Cement will be furnished to those at a distance with directions for using.

To all whom it was concean: This is to certify the have examined specimens and Roofs of W. E. Childs & Co.'s "Elastic Fire and Water-Proof Cement Roofing," and be-Here it to be eminently superior to any other kind of Roof ing in use. I was an eye witness of a severe trial of one of e Roofs from a large volume of flame from an adjoining building, which struck directly upon the roof and cornice for nearly half an hour. It stood the trial beyond all expectation, and saves the building. T. M. HASKELL,

Having made considerable inquiry as to the merits of the "Patent Elastic Cement Moofing," introduced into this city by thirds & Co., I find it to be lightly recommended in this city by many excellent judges; that it is meeting with very dy and general introduction; that its superiority over the tar composition Roofing is decided and freely admitted, and finally, I expect to adopt it for my next root, which will be next summer—having intended to use tin, but will try the virtues of the "Fatent Elastic Roofing" as a submittate.
